

OCTOBER 2022 NACR QUARTERLY REPORT ON STAFFING AND COVID-19 IMPACT

(Data from the NACR Annual Survey of Staff, collected via Qualtrics)

This is the fifth Quarterly Report for NACR focusing on NHS staffing - including the redeployment rates, staff loss and replacement of staff.

NHSEI, supported by HEE, are presently modelling future staff numbers and types of staffing required as part of levelling up post-Covid and in the context of workforce needed to achieve the LTP 85% uptake target for patients with acute coronary syndrome and 33% for patients with heart failure.

Each year NACR collects information on the staffing profile of CR programmes via an online survey, e.g. staff types, bands and hours. In more recent years, since Covid-19, the team have also collected redeployment information - this was reported for the first time in the 2021 NACR Quality and Outcomes Report. Due to the increasing spotlight on NHS staffing - including the redeployment rates, staff loss and replacement of staff that have left – NACR are focussing on these metrics, for the period Jan-Dec 2021, in this quarter's report.

In the NACR 2021 staffing survey the following questions were asked:

- 1a. Thinking about 2021 Calendar year (Jan-Dec), due to the Covid-19 pandemic were any of your staff redeployed or stopped providing CR?
- 1b. If staff were redeployed/stopped providing CR is your staff team back to pre Covid-19/March 2020 levels?
- 2a. Since the start of the Covid-19 pandemic, have any of your staff left the CR team?
- 2b. If so were these posts replaced?

Using the combined NACR survey data from programmes in England, Wales and Northern Ireland over half of all services reported that staff were redeployed and also that service was interrupted (58% and 56% respectively). Of those services that reported redeployment 83% reported to have had their staff returned with only 1% stating 'No, all staff are still redeployed/stopped providing rehab'. Nation specific CR programme staffing data is presented in the Excel spreadsheet that accompanies this quarterly report.

In terms of staff loss 34% stated that they had no staff loss and two thirds that there was some staff loss. The most common reasons were staff moves within the NHS (50%) or staff retirement (48%). The most concerning statistic is that of the 110 services that reported staff had left the team 73% stated that not all positions had been replaced (22% - some positions replaced and 51% - no positions replaced).

NB: Unlike other Quarterly Reports this one is a snapshot survey that will be re-run in Oct 2023. The previous QR reports on gender and marital status will be re-run in 2023 once the impact of the National Data Opt-out has been assessed.
